HULK 25 EC

**PUBLIC HEALTH
INSECTICIDE**

**CRAWLING
INSECTS**

**FLYING
INSECTS**

Method of use:

Controls all kind of flying and crawling insects

Dilute 1 to 2L of HULK 25 EC in 50L of water to cover 300m²:

The diluted solution must be used quickly (does not keep). Usable at 1% in thermal fogging.

Spray using a directional jet device on the walls of premises to be disinfected, until light flow. Let dry. To have a better residual effect, avoid the use of detergent on treated surfaces after application.
