

BORON ETHANOLAMINE 12%

Liquid

Fertilizer

Nutrition & Protection

Boron deficiency in Cauliflower

A water-soluble suspension of 12% Boron–Ethanolamine quickly absorbed and assimilated by the crop. Its stimulates growth and promotes calcium mobility and assimilation. It is used to prevent /correct alterations caused by deficiency or imbalance in the assimilation of this micronutrient.

**Boron -Ethanolamine
12% Liquid**

BORON ETHANOLAMINE 12%

Liquid

FERTILIZER

- Liquid fertiliser with boron complexed with ethanolamine, totally soluble in water and with rapid foliar and root absorption.
- Its use is recommended as a preventive and as a corrector during the stages of increased metabolic activity..
- Boron activity is essential for plant metabolism: indeed, this trace element supports the regulation of Nitrogen absorption and facilitates tissue extension, seed and pollen germination as well as the channelling of reserve sugars and many other basic functions.
- Boron deficiency is shown by bursting of tissue, perishing of the growing points, heart and dry rot, bad blossom quality and reduced fruit setting, deformed fruits.

Dosage:

Can be applied to all Crops:

Fruiting vegetable (tomato, eggplant, pepper...), Potato, Cucumber, melons.

Pome fruit, Stone fruits, Citrus, Olive, Grapes, Field crops and Ornamentals..

FOLIAR: 50 – 100 CC/100 Liter Water

Compatible to mix with other fertilizers and pesticides
