POTASSIUM HUMATE 10% Powder

FERTILIZER

- It helps chelating micro-nutrients and absorbing macro-nutrients when mixed with them in the fertilizer solution, which help plants benefit the most of these nutrients usually not readily available.
- It accelerates the formation of pigments necessary for metabolism which increases the chlorophyll content of the leaves, activates metabolism and increases its rate.
- It improves soil properties and makes it ideal for planting when mixed with it or when used with irrigation water.
- It contains potassium in concentrations needed by the plants so it can be used preventive and therapeutic in cases of potassium deficiency.
 - It controls the ability of the plant to exchange positive ions (cations) and therefore increases the plant's ability to retain water and fertilizer elements.

Dosage:

Can be applied to all Crops:
Fruiting vegetable (tomato, eggplant, pepper...), Potato, Cucumber, melons.
Pome fruit, Stone fruits, Citrus, Olive,
Grapes, Field crops and Ornamentals..

Foliar Spray 300 grs/ 200 Litre water
Soil Fertigation: 2.38- 3.57-Kg / Ha
