INNOVATIVE INSECTICIDE BAIT FOR FLY CONTROL

**Made with DINOTEFURAN,
last generation insecticide MOLECULE.**

Insecticide for fly control in livestock spaces and enclosures. (poulties, barns, stables, dairy facilities, etc) Contains natural attractant irresistibly to attract flies.

- Water Soluble Powder to apply by painting
- Very fast action, in few hours
- Long lasting action
- Acts by Ingestion and contact

• **Use:**

Apply the product mixing 100 grams of product with 80 ml of water, forming a paste of consistency similar to a paint thick

• **Dosage:**

Masterfly Bait is applied in doses of 100 grams of products for an area of 100m².

• **Way of use:**

It is very important to concentrate the application in certain areas. Identify the areas where flies prefer to perch and apply the solution in those specific areas

• **Painting:**

Paint plastic or wood sheets with a brush or roller. approximately 30cm x 30cm, and hang in the places where flies are concentrated (around windows, corners, sunny surfaces ...)

(Contains dispenser in the inside of the container)

**Available in:
125 g and 500 g**
